Use Your Transmitter

1. Turn on your transmitter and press the **Pairing** button to go to pairing mode.
2. Turn on your speaker and make sure your speaker is in pairing mode (refer to your speaker's user's guide). The transmitter pairs automatically, and the Bluetooth indicator lights steadily.
3. Plug your transmitter's built-in cable into your audio device's 3.5mm headphone jack.
4. Use your audio device's playback controls.
5. Turn off your transmitter after use.

Device Not Pairing?

Many Bluetooth-enabled devices, such as speakers, remember the most recently paired source (music, smartphone, etc.) and automatically reconnect when turned on. This is convenient, but can prevent you from connecting to a new source.

If you can't pair your transmitter, you may need to disconnect it from its previous source.

5

Notes:

- If the previously paired speaker is not available, press the **Pairing** button to search for your speaker.
- To clear your transmitter's pairing history, press and hold the **Pairing** button for 2 seconds (Bluetooth indicator flashes 5 times).
- If no speaker is connected within 10 minutes, the transmitter automatically enters sleep mode (Bluetooth indicator turns off). To resume searching, turn the transmitter off, then on again.
- The transmitter will disconnect from your speaker if they are too far apart (Bluetooth indicator flashes quickly). To reconnect, move the transmitter closer to the speaker within 1 minute.
- Nearby Bluetooth devices can interfere with your transmitter's connection. If this happens, move other Bluetooth devices at least 32.8 ft. (10m) from your transmitter.
